Investment: \$85 for a Green Built MI Member; \$105 for non-members

Presenter: Arn McIntyre of McIntyre Builders, Inc.

Location: HBAGGR Offices located at 3196 Kraft Ave SE, Suite 300, Grand Rapids, MI 49512

To register call (616)281-2021 x249

Date & Time: September 14, 2010 from 1:00pm – 4:00pm (lunch is included and will be offered at 12:00noon)

Why attend?

Green Built Michigan has created a the Advanced Builder Training, offering anyone who is already familiar with the basics of Green Built Michigan and green building an opportunity to delve deeper into the science of residential green construction. An in-depth course offering specific applicable building practices to build greener, better homes. All members of Green Built Michigan are strongly encouraged to attend the Advanced Builder Training. Upon completion of the course, attendees will:

- Have in depth understanding of the house as a system approach to green building
- Understand the thermal dynamics necessary to achieve the most effective and economical level of insulation
- Control moisture and durability for each component of the building envelope
- Improve sustainability through the proper selection of building materials and correct installation methods
- Achieve superior indoor air quality
- Save on materials expenses while improving each area of the home
