

Builders! Subcontractors!

A whole new way to bid...
Upload projects now on the brand new BidFusion online bidroom!

BID FUSION

A simple, smart solution for builders and their subcontractors. Upload plans, invite or open up the bidding, and watch the bids come in!

Subcontractors—this is a whole new way to generate leads from builders!

Here is what members have to say:

"BidFusion is going to change the way builders and trade contractors do business in this community."

The bidding process is faster and more professional. Builders have the option to seek a closed bid from only selected associates or they can open up the bidding process all associates within a particular trade. The open bidding process will bring business opportunities to more of our associates than ever before."
- Rich Kogelschatz, Heartland Builders

"It's a very interface to work with, easy to navigate, haven't had any issue with loading plans, specs, etc. It's nice and simple."
- Chris Hall, Habitat for Humanity

The screenshot shows the BidFusion web application interface. The browser title is "BidFusion™ (beta) - Windows Internet Explorer". The address bar shows "https://builderfusion.hbaggr.com/bf/bid/builder/". The page header includes the BidFusion logo and navigation links: Home, Projects, Preferences, Log Off, and Help. The main content area is titled "My Project Manager: Home" and displays a table of active projects. Below the active projects table, there is a section for pending projects and a table of action items.
