

Home & Building Association Internship Program

Student interns not only bring a fresh perspective and innovative ideas to an organization, but they also exude a contagious level of energy and excitement to your staff, your customers and the community as a whole. The Home & Building Association's is now offering a new internship program that will encourage students to get involved in our local organization and not only benefit the Association, but it's members as well.

The Home & Building Association's internship program is supportive of the mission of the HBA to empower our members to succeed through education, advocacy, networking, and promotion. The program's results are a function of the following two goals:

1. To provide a well-rounded experience for interns in specific nonprofit association functions.
2. To help keep talent in the West Michigan region by involving and supporting interns in the process of enhancing the local housing industry and business climate.

Internship Opportunities are posted on www.interninmichigan.com
